

Lion City Education KinderCoin 1 Page Summary

CRYPTOCURRENCY
POWERING EDUCATION

Participate early in the new wave of tokenized businesses - Real businesses with real values. Less people are believing in start-ups with unproven teams and track records.

- In the 2001 internet bubble burst, many paper millionaires lost their paper profits. KinderCoin is safer as it is backed by real physical assets and an education business.
- Diversification. KinderCoin allows token holders to take part in a rare business expansion opportunity normally available to high net worth private equity investors.
- Liquidity. Able to contribute any amount without lock-in by selling on the exchange anytime.

KinderCoin Features

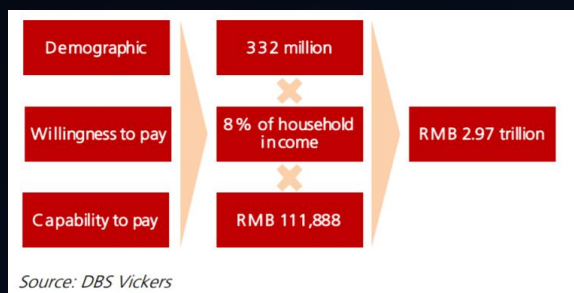

- Able to use to pay for courses in the kindergartens and schools.
- 80% of ICO raised goes into development of kindergartens and schools. 80% of all profits will go towards KinderCoin.
- Easy valuation using stock valuation techniques. Profit margin of existing schools are 20%. Discounted Cash Flow valuation for KinderCoin is projected to be 8.21x of investment in 1 to 1.5 years time after all the funds are fully utilised.
- Or relative valuation using similar listed companies such as US:TAL, US:EDU and HK:1317 are currently valued at P/E ratio of 27 to 116.
- Assuming a valuation of a conservative P/E ratio 20 is applied to KinderCoin, in about 1-1.5 years, KinderCoin's value should top a projected growth of 3714% on starting capital.

Introduction to Lion City Education

- Lion City Education is a premier education business that is currently number 1 in Zaozhuang City, Shandong Province of China.
- Running for 4 years and counting, it serves students from ages 3 to 18 and provides after-school educational services as well as overseas educational trips
- It is currently aggressively expanding via building up more schools and creating a franchise within the next 5 years

China Education Sector

- High potential growth for education businesses. In 2015, Tencent Education estimated the total training market size to be RMB 882 billion. The total education market would then be around RMB 1.57 trillion in 2015, with 60% going into after-school training.
- Demographics. Increase in student numbers due to relaxation of China's one-child policy.
- Increased in Parents' willingness to pay. Due to the higher competitiveness or greater desire to obtain an overseas education, more parents are spending more than ever on private education.

- Based on analysis in line with ours, DBS bank expects the education spending growth to hit RMB 3 trillion by 2025.
